description

The ITT EasyHelp, with its distinctive big buttons is a scaled-down mobile phone that's easy to grip and simple to use. It's been designed for people who just want a phone to make and receive phone calls and SMS Text Messages. ITT's EasyHelp is however not completely lacking features, it has a 100 memory phone book, built in flashlight and magnifying glass in addition to an emergency safety button. Large buttons also make the phone user friendly. It is easy to see the phone number keyed in, thanks to the large fonts on the high contrast colour display. It has a very loud handsfree speaker that allows the phone to be used without holding to the ear. The Easyhelp also has a vibrating alert, alarm clock, calculator and a currency / metric converter.
