description

The ITT EasyUse, with its distinctive big buttons, is a scaled-down mobile phone that's easy to grip and simple to use. It's been designed for people who just want a phone to make and receive phone calls, who prefer mobile phones with few functions and that are easy to use. ITT's EasyUse is however not completely lacking features, but provides the most important and relevant ones. The phone has four buttons that can be pre-programmed, labelled A to D. Large rubberised buttons also make the phone user friendly. It is easy to see the phone number keyed in, thanks to a large, high contrast white on black display. It has a very loud handsfree speaker that allows the phone to be used without holding to the ear.
